

What is Autism?

Autism is a complex developmental disability that typically appears during the first three years of life and affects a person's ability to communicate and interact with others. Autism is defined by a certain set of behaviors and is a "spectrum disorder" that affects individuals differently and to varying degrees. There is no known single cause for autism. Autism is treatable. Children do not "outgrow" autism, but studies show that early diagnosis and intervention lead to significantly improved outcomes.

Some signs to look for in the children in your life:

- Lack of or delay in spoken language
- Repetitive use of language and/or motor mannerisms (e.g., hand-flapping, twirling objects)
- Little or no eye contact
- Lack of interest in peer relationships
- Lack of spontaneous or make-believe play
- Persistent fixation on parts of objects and/or lining up of toys or objects
- Impaired ability to initiate or sustain a conversation with others
- Restricted patterns of interest that are abnormal in intensity or focus
- Inflexible adherence to routines or rituals

The mission of the **Johnson County Autism Support Group, Inc.** is to provide support to families affected by autism. The group provides funding for professional therapy, summer programs, and community and educational grants.

Group efforts are supported by this outing and Jack's Walk for Autism. The walk is held the first Sunday in October at Province Park in Franklin. For more information, contact Angela Coy at angela@jcasg.org.

JCASG, Inc is a qualified 501(c)(3) organization and all contributions are deductible to the extent allowable by tax law.
